Please do not remove the ability to trade listed options in a self directed IRA. While the uninformed may think that trading options is inherently risky, my options trading is primarily around using covered calls, which is, in fact, very low risk and conservative. It is a way to get income on my investments at a time when interest rates provide no opportunities for income on savings. It would be misguided and naive to take this opportunity away from retired or retiring individual investors.

Regards,
Neil Blumenfield
retired and living off my investments
